## INTRODUCTION

I don't know where to start! This would be the most common phrase every math teacher hears from their students including those with a strong knowledge of basic math facts. As soon as math facts are translated or embedded into word problems or mathematical sentences with unknowns, the whole world turns upside down for math learners. What is the solution for this? Yes! Grasping and applying the right problem-solving strategy is the key to diving into any math problem and completing it quickly as a wink!

## WHAT YOU WILL ACHIEVE

- To build confidence and gain knowledge of problem-solving strategy in mathematics especially for students who are considering math related programme in future

## METHODOLOGY

Lecture

Interactive Activities

Discussions

## WHO SHOULD ATTEND?
