

WORKSHOP A LEVEL

Chemical Solutions for Climate Change:

Unveiling the Elemental Role of Chemistry in Sustainability

FREE ENTRY

1 HOUR
INTRODUCTORY
WORKSHOP

 **8 JUNE 2024 (SAT)**

 **9AM - 10AM**

 **MCKL PYKETT CAMPUS**

INTRODUCTION

Earth's atmosphere is incredibly complex and human activities have changed its composition in ways that result in extreme changes of climate. This activity looks at the chain that leads from human action in one place to an effect on the environment in another place.

WHAT YOU WILL ACHIEVE

- To help learners understand better on how the different elements they have learnt about fit together into one integrated whole
- To relate chemistry with different field of studies and opportunities in future

Methodology

Workshop

Who should attend?

SPM
Leavers

IGCSE
Students

Secondary
School
Student

Limited Seats Available, **RSVP NOW!**
